Education

2019/11 – 2022/11

BSc. (Hons.) Computing

Softwarica College of IT and E-commerce (Coventry University)

- Graduated in First Class Honors
- Developed numerous projects related to web app, mobile app, embedded and IOT related projects following both agile and waterfall methodology.
- Dissertation performed about 'Research on proper application of GIS in enhancing the trade of local medicinal herbs via. e-commerce and its application.'

Major Subjects:

- Agile Development
- Designing for Usability
- Programming, Algorithms and Data Structures
- Interactive Pervasive Computing
- Computer Architecture and Networks
- Real World Project

Professional Experience

2024/04 – present

Software Engineer

Techkraft Inc.

- Extracted and transformed data from AWS S3 to meet business requirements, focusing on US healthcare projects.
- Executed ETL operations and developed workflows and data pipelines using Databricks.
- Developed and implemented scripts and tools to automate manual tasks, ensuring compliance with company standards and preparing necessary metrics.
- Documented various organizational work processes to streamline operations.
- Established priorities, estimated schedules, and ensured timely delivery of projects.
- Regularly reviewed and adjusted test procedures to maintain quality and accuracy.
- Conducted data analysis and development activities, providing insights and actionable recommendations.
- Performed data validation and verified the application of business rules to ensure data integrity.

2023/01 – 2024/03

Lalitpur, Nepal

Quality Assurance Engineer

Techkraft Inc.

- Enhanced and optimized Nepalese Fintech software by identifying and rectifying critical vulnerabilities and bugs, leading to a 25% improvement in performance.
- Collaborated with cross-functional teams to resolve crucial UI issues, improving usability and accessibility for users from rural areas who were less familiar with evolving technologies.
- Coordinated release management activities, ensuring smooth deployment of software updates and releases in production environments.
- Conducted market research, developed customer personas, and adjusted marketing strategies; optimized content and suggested improvements based on data to refine strategies and increase effectiveness.

2022/07 – 2022/08

UI/UX Trainee

TechAxis

- Learned and applied User-Centered Design (UCD) principles to optimize interface designs.

- Conducted user studies and evaluations to identify key usability issues.
- Utilized qualitative and quantitative methods to gather and analyze user feedback.
- Acquired knowledge about the prototypes and wireframes to communicate design ideas and improvements.

Projects

2024/04 – 2024/05	Airbnb Listings Analysis in New York City  <i>Utilizing SQL for data querying and Python for data visualization, this analysis aims to provide a comprehensive overview of the Airbnb landscape in New York City.</i> • Extracted and analyzed Airbnb data using SQL Server, and created visualizations with Python (pandas, matplotlib, seaborn) to explore price, reviews, and accommodations. • Leveraged Excel, Tableau, Figma, and Mapbox for data presentation. • Identified key insights on pricing strategies, neighborhood preferences, and the impact of superhosts on reviews and pricing.
2022/06 – 2022/08	Ecommerce Application  <i>An e-commerce website for furniture allows an admin to register, add products, and manage inventory, while users can register, view products, add items to their cart, and complete purchases through a secure payment gateway for delivery.</i> • A Dynamic ecommerce site was built website developed by implementing scrum framework of agile methodology. • As a scrum master for the project I facilitated Scrum Events and coached the team by tracking the progress, fostering collaboration and to ensure a quality product. • Deeply concerned in identifying and addressing any obstacles or impediments that may hinder the team's progress and work to resolve them quickly.
2024/04	Product Sales Analysis in Electronics Sector  <i>Uncover insights that can drive better product decisions, improve sales strategies, and identify potential areas for growth by leveraging data from both internal and external sources.</i> • Pandas (Data manipulation) NumPy (Numerical computing) Matplotlib/Seaborn (Data visualization) were employed for verification. • Raw sales data for electronic products were processed and cleaned data ready for analysis.
2021/12 – 2022/02	Smart Kitchen System  <i>Designed and implemented an intelligent kitchen automation system utilizing IoT technology to enhance convenience and efficiency. Utilized the Blynk app to enable real-time monitoring and control of kitchen appliances, providing a user-friendly interface for remote operation.</i> • Engineered the system to optimize energy usage, improve safety, and offer personalized cooking settings, resulting in a more efficient and user-centric kitchen environment. • Successfully reduced energy usage by 30% through automated control of appliances and efficient energy management, contributing to sustainability and cost savings.

Certificates

AWS Academy Graduate - AWS Academy Cloud Foundations 
 Amazon Web Services Training and Certification

Annual HIPAA Training and Fraud, Waste, and Abuse for Healthcare 
 Abacus Insights

Project Management Foundations 
 LinkedIn Learning

Scrum: The Basics 
 LinkedIn Learning

Skills

Technical

SQL, Python, Databricks, PySpark, AWS, Jira, Tableau, MS Office

Soft Skills

Effective Communication, Resilience, Oratory, Teamwork and Collaboration, Networking

Professional Competencies

US Healthcare, Strategic Planning, Documentation and Report Generation, Research and Analysis, Proposal Writing, Community Outreach

Volunteering Experiences

2022/07 – 2023/06
